

**Do NOT be fooled by bogus “Private Property” groups**

**The Mark Udall Amendment Protects Private Property**

July 17, 2003

Dear Member of Congress,

I urge you to protect private land and private property rights by supporting Representative Mark Udall's Interior Appropriations amendment to stop the RS 2477 land giveaway.

Currently, San Juan County, Utah is using RS 2477 to claim a primitive two-track that runs across 40 acres of my private property as a county road. Though the track has not been developed and has never been maintained, and in fact, has not even been used for the last five years since we fenced in our property, the county still asserts that they have the right to construct a county road across our property without our consent. Two recent title searches for the property show no legal access to or through my property.

Please support the Mark Gilchrest amendment to stop the RS 2477 land giveaway.

Sincerely,

A handwritten signature in black ink that reads "Kenneth M. Platt". The signature is fluid and cursive, with the first name "Kenneth" being more prominent and the last name "Platt" following in a similar style.
